

## Solar Cell Manufacturing Solutions

Vanpro manufactures a wide range of carriers that can be used to safely protect solar cells during processing and transport. High stability and rigidity ensure the most secure protection and all carriers interface with automation equipment. Knowledge of materials, coupled with unsurpassed engineering design and manufacturing expertise, allow Vanpro to quickly turn your ideas into viable solutions.

Founded in 1977, Vanpro offers precision machining, sub-assembly and contract manufacturing services to customers in a broad range of industries, including medical, semiconductor, solar, communications and defense. Vanpro was built on the belief that honesty and integrity are absolutely essential in developing and maintaining the trust that supports an on-going business relationship. We are committed to 100% on-time delivery and 100% customer satisfaction.

## Dye Selection Guide

*The color of Clear or Hardcoat Clear Anodize is dependent on alloy, surface finish and coating thickness.*

*Due to periodic color changes and alloy response to dyes, samples should be submitted to develop a color range.*

Vanpro boasts a 53,000 square-foot facility with state-of-the-art engineering, machining, assembly and quality control capabilities. For more information visit us at [www.vanpro-inc.com](http://www.vanpro-inc.com).

**Vanpro is ISO 9001:2008 Certified**

*Complete Tier One Supplier of Precision Machined Components and Assemblies*
