

Dye Selection Guide

Battleship Grey	Blue	Blue Grey	Brown	Clear	Green
Hardcoat Clear	Inside Gold	Orange	Outside Gold	Pewter	Pioneer Black
Purple	Red	Titanium Grey	Yellow		

The color of Clear or Hardcoat Clear Anodize is dependent on alloy, surface finish and coating thickness.

Due to periodic color changes and alloy response to dyes, samples should be submitted to develop a color range.

To optimize wafer handling and transport in your facilities, Vanpro is pleased to offer a number of custom wafer carrier solutions. We have a dedicated Engineering team available to assist you with your specific needs, and we will work with you and your OEMs to develop customized solutions to your requirements.

Founded in 1977, Vanpro offers precision machining, sub-assembly and contract manufacturing services to customers in a broad range of industries, including medical, semi-conductor, solar, communications and defense. Vanpro was built on the belief that honesty and integrity are absolutely essential in developing and maintaining the trust that supports an on-going business relationship. We are committed to 100% on-time delivery and 100% customer satisfaction.

Vanpro boasts a 53,000 square-foot facility with state-of-the-art engineering, machining, assembly and quality control capabilities. For more information visit us at www.vanpro-inc.com.

Vanpro is ISO 9001:2008 Certified

Performance Characteristics

- Flexibility of color-coding carriers to differentiate processes
- High rigidity and dimensional stability
- High profile design for maximum protection
- Variety of materials available, including aluminum, stainless, magnesium, polypro, polycarb and others on request
- No minimum order quantities
- Vented screws for improved drainage
- Customized capacity to meet your specific needs – 25-wafer capacity is standard
- Handle on solid end wall for ease of transport
- ID tags/barcoding/laser marking available

Complete Tier One Supplier of Precision Machined Components and Assemblies
